
(a) i at 380 s: is j on its path within $\pm\delta$? $m_{ij}(380) = 1$
i: circles in P until 600 s
j: straight line, in P at 500 s
$\varepsilon_h = 500$ m around i
j at 260 s
j at 380 s
j at 450 s
j at 500 s
thick: j in the window $[260, 500]$ s
(b) j at 380 s: is i on its path within $\pm\delta$? $m_{ji}(380) = 0$
$\varepsilon_h = 500$ m around j
j at 380 s
i in $[260, 500]$ s: only here
